Portfolio: jyotsoni-dev.in

SKILLS SUMMARY

- **Languages:** JavaScript, TypeScript, C++, Python, SQL
- **Backend & Data:** Node.js, NestJS, Express.js, MongoDB, MySQL, OpenSearch, ClickHouse, Redis, BullMQ
- **Frontend:** ReactJS, NextJS, Angular, AMP, SEO
- **Tools:** Git, Docker, JIRA, Grafana, Loki, Stripe, Paddle
- **AI Workflow:** Claude Code, Cursor, MCP, Agentic Skills, Subagents, Spec-driven development

EXPERIENCE

- **Saleshandy** Ahmedabad, India
Software Engineer Jan 2024 - Present
 - **Reveal Pipeline:** Rebuilt the lead-enrichment reveal pipeline from a 2-queue batch monolith into a 6-stage, 12-queue distributed system with Start-time Fair Queueing and per-lead virtual-time priority, scaling single-operation capacity from 100 to 10,000 leads, cutting mean end-to-end latency 34.8% across 868K production reveals, and sustaining a 157,995 leads/day peak on a single instance.
 - **Search Platform:** Architected the people and company search layers from scratch on OpenSearch over licensed B2B datasets, covering 868M person records across 50+ filters and 40M company records across 70+ filters, with tuned field boosting and function-score relevance ranking.
 - **Ingestion Pipeline:** Built the pipeline normalizing raw multi-vendor payloads into a structured schema with a per-profile lead quality score computed at ingest, dual-writing to OpenSearch and MongoDB; hardened a 5-vendor enrichment waterfall with circuit breakers, retry budgets, and recovery sweeps, validated by 2,002 automated tests including 53 fault-injection scenarios.
 - **ClickHouse Analytics:** Engineered a ClickHouse analytics layer for outreach reporting over a 290M+ row event table, dual-writing engagement events from 17 MySQL mutation paths into a ReplacingMergeTree fact table, with a strategy-pattern query architecture spanning 45 ClickHouse and 40 MySQL builders behind one interface and health-gated fallback so analytics degrade rather than fail.
 - **Inbox Radar:** Built the execution engine for a multi-tenant email-deliverability platform, measuring inbox, spam, and tab placement across Gmail API, Microsoft Graph, and IMAP through three tuned BullMQ queues with staggered multi-attempt detection and deterministic job IDs, plus self-healing cron sweeps and a Redis-to-Firestore pipeline streaming live results without polling.
 - **AI-Assisted Development:** Standardized development on a git-tracked, 8-contributor Claude Code configuration, authoring the team's default feature-lifecycle command, a 6-skill Playwright QA pipeline, and a database-optimizer agent gating every non-trivial query change.
- **Testbook** Mumbai, India
Software Engineer Jan 2023 - Jan 2024
 - **Static Rendering Migration:** Migrated 15K+ pages to static rendering using an in-house framework, raising Google PageSpeed scores from 54 to 100.
 - **Typing Test Feature:** Built a typing-test module for a new exam pattern, adopted by 10K+ users with a 4.5 average rating.
 - **Performance & Framework Work:** Implemented an API response caching layer that cut outbound API calls by 20%, and migrated legacy AngularJS pages to Angular with zero functional regressions.
- **Caarya Innovative Solutions** Hyderabad, India
Full Stack Developer May 2022 - Aug 2022
 - **Backend & Integrations:** Built CRUD REST APIs in Node.js with server-side PDF generation, integrated the Intuit/QuickBooks API for TDS and GST reporting, and implemented Firebase Cloud Messaging for push notifications.

EDUCATION

- **Indian Institute of Information Technology, Vadodara** Gandhinagar, India
Bachelor of Technology - Information Technology; CPI: 8.50 July 2019 - June 2023

PROJECTS

- **E-Voting: Blockchain Based Voting System (Web Development, Blockchain):** Secure voting platform with tamper-proof transactions via smart contracts, covering registration, voting, and result declaration with admin phase management and analytics. Tech: React.js, Node.js, MongoDB, Solidity, Ganache (July '21 - Dec '21)

HONORS AND AWARDS

- Awarded a medal for graduating 2nd in B.Tech Information Technology, IIIT Vadodara
- Star Performer of the Quarter at Testbook, and Dashing Debut award within 2 months of joining
- Solved 280+ coding problems across Leetcode, GeeksForGeeks, and Hackerrank
